

1. MID-DAY CLEANING

- a. Sweep floor around the walk-off mats
- b. Dust mop entire area

2. SPILL REMOVAL

- a. Check areas where spills are likely
- b. Remove spills as quickly as possible
- c. Clean the area with PCM Deep Clean diluted per label instructions
 - i. Use an auto scrubber on wide open areas.
 - ii. Use a wet mop in areas where the auto scrubber can't reach
- d. If the area is dull after stain removal, start with a low grit Revive-Maxx Floor Polishing Pad and work your way up to a higher grit until desired shine level returns
- e. Use a pump-up sprayer to liberally apply PCM Stain Guard to floor
- f. Spread Stain Guard evenly over surface using micro-fiber mop pad
- g. Allow the floor to dry for 30-60 minutes, or until dry, before exposure to foot traffic
- h. During evening hours or when appropriate, burnish the area with a high-speed burnisher (2,000 RPM) equipped with a Unitex White Floor Pad

3. NIGHTLY MAINTENANCE

- a. Check areas where spills are likely
- b. Remove spills as quickly as possible
- c. Clean the entire floor with PCM 365 diluted per label instructions
 - i. Use an auto scrubber on wide open areas
 - ii. Use a wet mop in areas where the auto scrubber can't reach

4. WEEKLY MAINTENANCE

- a. Dust mop the entire area
- b. Clean the area with PCM Deep Clean diluted per label instructions
 - i. Use an auto scrubber on wide open areas
 - ii. Use a wet mop in areas where the auto scrubber can't reach

5. SIX MONTH/SEMI-ANNUAL MAINTENANCE

- a. After performing Nightly Maintenance, allow the floor to dry completely
- b. Burnish the traffic wear area using an appropriate grit Revive-Maxx Floor Polishing Pad*
- c. Use a pump-up sprayer to liberally apply PCM Stain Guard to floor
- d. Spread Stain Guard evenly over surface using micro-fiber mop pad
- e. Allow the floor to dry for 30-60 minutes, or until dry, before exposure to foot traffic
- f. Burnish the area with a high-speed burnisher (2,000 RPM) equipped with a Unitex White Floor Pad

6. TWELVE MONTH/ANNUAL MAINTENANCE

- a. After performing Nightly Maintenance, allow the floor to dry completely
- b. Burnish the traffic wear area using an appropriate grit Revive-Maxx Floor Polishing Pad
- c. Once the desired look is achieved on the traffic wear areas, burnish the entire floor area using consecutively higher grit levels of Revive-Maxx Floor Polishing Pads until desired shine level is achieved
- d. Use a pump-up sprayer to liberally apply PCM Stain Guard to traffic wear areas
- e. Spread Stain Guard evenly over surface using micro-fiber mop pad
- f. Allow the floor to dry for 30-60 minutes, or until dry, before exposure to foot traffic
- g. Burnish the area with a high-speed burnisher (2,000 RPM) equipped with a Unitex White Floor Pad

*Revive-Maxx pads are available in grit levels ranging from 400 to 3,000. It is important to match the right floor pad grit level to your floor's profile. If you have an 800 grit floor profile, but use a 1,500 or 3,000 grit floor pad, you'll end up with "shiny spots" on the floor.

Consult with your Jon-Don sales representative to help identify your floor polish level.
